

## Sample Cookie Template

This is simply an example of the kind of templates that I provide in my "complete cookie set" classes. These template sheets will generally provide all of the shapes needed for a given project. But for this foundations class you can simply use this carrot shape to practice your hand-cutting skills.

Cut around the outside edge to create cookie cutter templates. Interior lines can also be used as cut-out (or projector) guides for your baked and ready-to-decorate cookies.
