

Thermos

Food Marker

1. Use a food marker along with either your projector or paper templates to mark the lid line on your cookie.
(More details in the video)

Pale Blue PIPING

2. Pipe a line along the bottom lid line. Complete the shape by piping around the top edge of the cookie.

Green PIPING

3. Pipe lines along the bottom edges of the cookie to outline the base of the thermos.

Pale Blue FLOOD

4. Fill in the lid, using your scribe to pull icing to the edges.

5. Allow your icing to dry or, at a minimum, crust over.

Green FLOOD

6. Fill in the base of the thermos. Work quickly since you'll be doing some wet-on-wet work.

White FLOOD

7. With the green icing still wet, pipe two small ovals in the locations shown.

Scribe

8. Place your scribe in the middle of an oval and pull the icing upward to a point. Repeat this motion down, left and right. Also repeat with the second oval. (More details in the video)

White PIPING

9. Still working quickly (since you want your base icing to still be wet), pipe vertical lines above and below each star.

Thermos (cont.)

Dark Gray PIPING

10. With your base icing still wet, pipe a series of curved lines, similar to what's shown. Or feel free to make your own pattern of lines.

11. Allow your icing to dry or, at a minimum, crust over.

Pale Blue PIPING

12. Pipe a curved line along the bottom edge of the lid.

Pale Blue PIPING

13. Pipe a second curved line above the first, starting and ending where the lid angles.

Tan PIPING

14. Pipe the outline of a slanted rectangle with the upper corner near the lid.

Tan PIPING

15. Pipe a small circle inside the rectangle, near the top corner.

Tan PIPING

16. Pipe some squiggly lines inside the rectangle to help minimize cratering of your flood icing.

Tan FLOOD

17. Fill in the rectangle, excluding the circle. Use your scribe to pull icing into the corners.

18. Allow the tag to dry completely (several hours if possible).

Thermos (cont.)

Yellow PIPING

19. Pipe a line from the left side of the tag's hole to the right edge of the lid. Then pipe a line from the left side of the lid to the left edge of the tag. You can add a knot or bow as well if you'd like.

Food Marker

20. Making sure the tag is fully dried, write a message on it with your edible ink food marker.

ALL DONE!
